

## JUST GLEANINGS

### JUNK JEWELRY FOR NATIVES

San Francisco—A half-ton of junk jewelry—17,077 pieces of it—on its way across the Pacific to be used to pay natives in South Pacific war areas for work done for Allied troops.

### ALBERTA ROAD PROGRAM

As a preliminary to the starting of Alberta's 1943 road program, Hon. W. A. Palfrey, and his deputy, G.R. Monkman, are currently touring the south country viewing local conditions. It is expected that an early announcement of road projects will be made if the present rate of drying continues.

### NIGHTCLUB OWNER CONVICTED

BOSTON—Barnett Welansky, owner of the Coconut Grove night club where 490 persons met death in a fire November 28th, was sentenced in superior court recently to serve 12 to 15 years in state prison for manslaughter. He was convicted on 19 counts of manslaughter and must serve his sentence at "hard labor".

### SCHWAB DIES "BROKE"

NEW YORK—Charles M. Schwab, who once turned down an offer of \$500,000 for a half interest in the Bethlehem Steel Company, actually was broke when he died. An estate appraisal disclosed that deceased had assets of \$1,283,500, against obligations of \$1,277,858.

Schwab started his career as a grocery boy and his fortune at one time was estimated at \$450,000,000.

### BRITAIN'S GIANT PLOW

A 4-ton trenching plow is busy in England turning acres of waterlogged ground into land that will yield crops before the year is out. It cuts channels 2 feet 9 inches deep at the rate of 100 yards in 10 minutes and forces up the soil into equal ridges on each side. It is hauled by a pair of bulldozers, driven by two diesel engines at each end of the field.

### NEWS NOTES

Pat Henry Kary spent the week end leave with his wife and family.

Mrs. J.C. Reed was a Calgary visitor this week and returned Wednesday.

Alexis of Newcastle was charged in Carbon police court last Wednesday night with conducting a lottery. He was defended by W.R. Sanderson of Drumheller and the case was heard by Police Magistrate Y.B. Hawkins, with Const. C.T. Ross prosecuting. Alexis pleaded guilty to the charge, but we understand that sentence was deferred.

### RED CROSS 56% OVER QUOTA

The Alberta Red Cross campaign, with a total of \$600,000, has gone "over the top" of the \$400,000 quota to the extent of \$200,000, or 56% per cent.

Reports are still coming in from outside branches, so the figure will be even higher when the final count is made.

## FOR SPRING WORK

- MEN'S CHAMBRAY SHIRTS ..... 1.19
- MEN'S COTTON SOX, per pair ..... 25c; 29c

### McKIBBIN'S DRUG STORE

A.F. McKIBBIN, Pharm. B., Prescription Specialist, CARBON, Alta.

## CARBON UNIT HAS QUOTA OF \$38,000 FOR VICTORY LOAN

### Everyone Must Make an Effort to Buy One Bond

Mr. S.F. Torrance, Unit Organizer for the Fourth Victory Loan, announced Tuesday that the quota for Carbon has been set at \$38,000, which is approximately one-third larger than the previous loan quota.

Mr. S.N. Wright is chairman of the local Finance Committee, with C.E. Nash and E.J. Rouleau as the publicity committee.

Cavansers appointed are: Village: Len Poxon and C.H. Nash. Press: Euse: E.D. McKellar and I. E. Brown.

South: Ed Ohlhauer, J.J. Ohlhauer and John Atkinson.

West and North: Jas. Gordon, S.N. Wright and A.F. McKibbin.

While conditions may not seem as favorable at this time of year to sell bonds, it is hoped that every household will buy at least one bond, even if it must be on the installment plan, and in this way the quota can be reached, if not surpassed.

We cannot all be in the battle zones of this war, but if we are to stay out of the firing line we must supply the guns and ammunition for those who are sacrificing their lives for us, and the only way we can do this is to buy Victory Bonds—NOW.

The loan opens on Monday, April 20th. Be ready to buy a Bond when the canvasser calls, or better still, do not wait for the canvasser, but go to the Unit Organizer, one of the canvassers, or apply at the Bank of Montreal, Carbon, and secure your quota as soon as possible.

### WATKINS—SANDLEY

A quiet wedding was solemnized at the Anglican church at 9 o'clock Tuesday evening, when Miss Gladys Bramley and Mr. Victor B. Hawkins were united in marriage, with the Rev. T. H. Chapman officiating.

Attendees were Miss Lillian Bercy and Mr. J. Gutman.

Immediately following the ceremony Mr. and Mrs. Hawkins left on a short honeymoon trip to Calgary, and upon returning will reside on their farm north east of town.

### WATER MAY BE CONTAMINATED

The Alberta Department of Health has issued a warning concerning the consumption of water. Owing to the long run-off of water in the province throughout the province, there is grave danger of contamination in all waters. The department has issued a warning to the public to be on their guard against drinking water from any source unless it has been tested and found to be safe.

The department has also issued a warning to the public to be on their guard against drinking water from any source unless it has been tested and found to be safe.

### UNTHRESHED GRAIN IN ALTA.

The Alberta Wheat Pool estimates that at least a million and a quarter acres of last year's crop remains to be threshed in Alberta. Of this total, approximately 600,000 acres in wheat. Very heavy losses have been sustained by farmers who were prevented by climatic conditions from finishing their threshing last fall. Grain not stooked or swathed was damaged by the heavy snowfall which occurred during the winter.

The worst conditions are in the territory extending between Calgary and Edmonton. There was considerable snowed grain which takes a discount of between 7 and 8 cents a bushel, but the worst loss is in grain that cannot possibly be harvested.

### LONG YEARS AGO

April 21, 1922

Len Poxon is the president of the Carbon Golf Club for 1922, and fees are \$2 for men and \$2 for ladies.

Seeding in the Carbon district has been getting under way, but rain Monday delayed farm work for a time. Some farmers have completed their seeding, while others are just starting.

The Grand Forks Athletic Association is planning for an active season and this organization now has a good deal of sports equipment. R. Garrett is the president.

Born to Mr. and Mrs. Leo Holstead, in Thursday, April 14, a son.

### FLAX YIELDS 10 BUS. PER ACRE

Alfred Holvik, who farms east of town, threshed 60 bushels of barley by the combine method last Friday and Saturday, and after taking a 15% dockage the yield averaged 10 bushels to the acre. Alf says that some damage was caused by the grain being out all winter, but he was satisfied with the yield. He still has 70 acres of flax to thresh (or did have the first of the week).

## "STOOK SWEEP" TO ASSIST FARMERS IN HARVESTING GRAIN

A "stook sweep" machine, which will replace 50 percent of the manpower required to operate a threshing outfit, will be built by blacksmiths trained by the Alberta Department of Agriculture, and will be used this spring to harvest the remainder of the 1942 crop.

R.J. Whitbread, Calgary, district agriculturist, is interviewing blacksmiths who are to go to Ods on April 19 to start work on the project. The provincial government is paying all expenses in the way of transportation, room and board.

The plan is to get a demonstration machine into each district as soon as possible.

The new machine is made with long steel or hardwood arms, mounted on two extra wheels and the entire outfit is again mounted in front of a small tractor. The arms are 12 feet long, 12 feet wide, which slides under the stooks and the machine is able to pick up about seven miles an hour.

EDITOR'S NOTE—Mr. Jas. Flaws of Carbon has been asked to inquire about the above, and while it is the intention of the Department to go ahead with the plan it will be some time before material will be available. According to information given to Mr. Flaws the machine will cost approximately \$250 to complete.

### FOR SALE—Malted barley, Germination 97%. No noxious weeds, 5c per bushel. Also Hulls oats, germination 96%. Inspectors' remarks: "this is a fine sample for seed. Price 45c per bushel (lost measure)." T. Cardwell, Granger, Alta.

Mr. Aaron Klassen of Calgary was a Carbon visitor last Thursday, checking over the local store of the Builders' Hardware.

Messrs. W.A. Brainer, Len Poxon, S.F. Torrance, F.J. Bessant and E.J. Rouleau attended Masonic Lodge in Carbon last Thursday evening.

Mrs. Perry Johnson and daughter, Eleanor, returned to Calgary last Friday after spending a few days with Mrs. M.J. Elliott.

Mr. and Mrs. C.A. Cressman were Drumheller visitors Friday evening.

Dr. and Mrs. Hoeg of Glendoch were in Carbon last week visiting with relatives and friends.

Mr. and Mrs. Stewart Hay, and Mrs. S.F. Torrance motored to Calgary the first of the week.

Mr. and Mrs. Harley Davidson and Donna of Drumheller spent Sunday in Carbon.

Mr. and Mrs. Gottlieb Ohlhauer of Turner Valley arrived in Carbon last Thursday and returned to the Valley Monday after visiting with relatives in the district. Mr. Ohlhauer just received a cable from his son, Arthur Ohlhauer, saying that he had safely arrived in England.

Friday, April 23rd, is Good Friday and a public holiday. All stores and business places in town will be closed Easter Monday, however, is not a general holiday.

Clean up time is at hand and many property owners in town have cleaned up their yards and put the grounds in respectable condition.

Sidney Coates, son of Mr. and Mrs. J.H. Coates of Carbon, received his call from the R.C.N.V.R. last week and is now training in Calgary.

Don't forget the Amateur Night program in the Farmers' Exchange hall this evening (Thursday). The Carbonist Corps is sponsoring the program.

The Choir of the Carbon United Church will render the following special musical numbers at the Easter Service Sunday morning:

Anthem: "The Lamb of God"; Male Chorus: "Go Tell the News"; Anthem: "Christ the Lord is Risen"; The Easter Communion will be celebrated at the morning service. Members will be received into the church fellowship. The minister will preach the theme, "The Triumph of the Empty Tomb".

ITALIAN PRISONERS BROOD ON THE "GLORIES OF WAR"

After a taste of the Eighth Army's army's hardships, retreat under the constant bombardment of the R.A.F., and final desertion by their German comrades in arms, this party of Italian prisoners of war appear to be indulging in some sober second thoughts about the "glories of war"—off repeated because of Mussolini's belligerent speeches. The man in the foreground has the air of one who has definitely "bucked the wrong horse".

### TRIED TO POISON DOGS—FINED

Bert Lakatos of Midsvalde, was fined \$25 and costs when he appeared before Magistrate Bond in Drumheller recently. He pleaded guilty to the charge of placing poison where it could be eaten by dogs.

It was charged that he distributed poison to poison dogs which were destroying his chickens. No dogs were poisoned, but one dog carried a piece of chicken away and left it on the porch of its owner—Drumheller Mail.

## LITTLE ITEMS OF LOCAL INTEREST

FOR SALE—Malted barley, Germination 97%. No noxious weeds, 5c per bushel. Also Hulls oats, germination 96%. Inspectors' remarks: "this is a fine sample for seed. Price 45c per bushel (lost measure)." T. Cardwell, Granger, Alta.

Mr. Aaron Klassen of Calgary was a Carbon visitor last Thursday, checking over the local store of the Builders' Hardware.

Anthem: "The Lamb of God"; Male Chorus: "Go Tell the News"; Anthem: "Christ the Lord is Risen"; The Easter Communion will be celebrated at the morning service. Members will be received into the church fellowship. The minister will preach the theme, "The Triumph of the Empty Tomb".

## SPRING HARVESTING NOW IN FULL SWING; SEEDING IS DELAYED

### Wheat is Grading Low But is Threshing Well

Many farmers have been busy the past week threshing the balance of their 1942 crop, and the grain has been dry and is said to be threshing well.

While yields are fairly good, the grades are disappointing. The bulk of the grain last fall graded three and four, but the spring threshing grain in some cases will go six and possibly feed.

Seeding has been delayed until the crop is threshed, although some work is now being done on the land, but this will not be general for another week or two, and may even be later, depending on the weather.

## WEPPINGS

MacDONALD—McCAKILL

A wedding of interest to Carbon took place at Knox United Church, Edmonton, on March 20th, when Miss Margaret, eldest daughter of Mr. and Mrs. J. McCaskill of Edmonton, was united in marriage to Proh. Sub. Lt. Hugh John MacDonald, R.C.N.V.R., son of Mr. and Mrs. MacDonald of Medicine Hat, and the late J.A. MacDonald.

Rev. Elgin G. Turnbull officiated. The bride, who was given in marriage by her father, chose a two-piece wool dressmaker suit of light blue, with matching hat, and other accessories of beige. Her flowers were a shoulder corsage of sweetest roses and forget-me-nots.

Miss Agnes Hill, cousin of the bride, was her only attendant. She wore a two-piece with navy accessories, and a corsage of pink roses.

Best man was Mr. John Hill of Calgary.

A reception to 50 guests was held following at the Garsneau home of the bride's parents, where Mrs. McCaskill received in an afternoon frock of navy silk with matching accessories and a corsage of red roses. Mrs. MacDonald, mother of the bridegroom, chose a dress of black silk crepe, with white accessories, accessories to match, and a shoulder corsage of deep red roses.

The couple left after the ceremony for a wedding trip to the Pacific coast. The bride is a graduate of the University hospital and the Ponoka Memorial hospital, and has since been associated as nurse with the St. John's hospital in Edmonton.

The bridegroom is a graduate in law from the University of Alberta and is associated with F.M. Shoultz, K.C., Calgary. The firm of Shoultz and MacDonald is in charge of a branch office in Carbon, and Mr. MacDonald makes regular visits here to look after the business of the firm.

Sub. Lt. MacDonald is on call to the R.C.N.V.R. and expects to be notified shortly to report for active duty.

The ban has been lifted on the highway and trucks and buses are again running on schedule.

\_\_\_\_\_

OTTAWA.—Gross revenues of the Canadian National Railways in 1942 reached \$375,000,000, averaging over one million dollars per day, an all time high. Net revenue, after the payment of all operating expenses, was \$86,655,869 an increase of \$20,047,528 over the previous year. The cash surplus, after payment of taxes, interest paid to the public and to the Government, was \$25,063,268, a new record and an increase of \$21,046,942 over 1941.

Charged to operating expenses the year was an amount of \$128,000, based on estimates prepared by the technical officers of the railway which has been carried to reserve to meet deferred repairs and renewals. "Last year's report," said Vaughan, "gave an indication that shortages of labour and materials for repairs and renewals were becoming evident and would increase as available supplies were diverted for war purposes. During the year difficulties in this respect have increased. Under these conditions,

Honey production in the U.S. less than two pounds a person.

## Same In Any Country

As a preparation for their open-air life the chosen A.T.S. devoted three weeks to P.T. and route marches. They were taken out seven miles, late at night in closed lorries, given a map, and told to make their way to camp on foot. If an exercise kept them up late they have seven hours sleep afterward with a late breakfast.

dies over 12,365 square miles with its comparatively dense population of 7,000,000 inhabitants and in Europe

When surveying the tremendous variety of British Colonies all over the globe with their innumerable languages, one may well groan when an Englishman who is going overseas doesn't know which language he should learn. What help would he get from the following list of countries where a great number of languages are spoken? In a country where Kilisipi Mandi (in parts of Kenya), Efik-Ibibbi (in Southern Nigeria), Melanese (in the Islands of the Melanesia), and the many languages of the Papuan Islands are the idiom of the people? Besides these, just to mention some of the more important languages, there are Chinese and English, and many of the Papuan and Khasian dialects, etc.

All these factors must be considered before you start studying English, Chinese, and other languages. Mr. Dutch. The apparently effortless yet so complicated administration of these widely scattered territories with their different customs, different tongues and different religions is an achievement deserving the very highest admiration.

covers just two square miles, on which, however, 20,000 people are crowded together. Gibraltar can boast she has 100,000 inhabitants. Malta, whose heroic battle has become a glorious page in history, possesses 265,000 inhabitants on 122 square miles. The British Empire, on the other hand, covers 25 million square miles, one-fifth, compared with Gibraltar.

The Falkland Islands form a contrast to Gibraltar. They are a small group of islands, with a population of 1,000 people, but they have a great strategic value. They are situated in the South Atlantic, and are the only British possession in the South Atlantic. They are the only British possession in the South Atlantic. They are the only British possession in the South Atlantic.

no more than 300,000 Europeans living in these territories, and of these 300,000 Europeans more than half are concentrated in four parts of the Empire. Seventy thousand Europeans live in about 300,000 square miles of territory in north-east Africa, 33,000 in Kenya, Tanganyika and Uganda, some 50,000 in Hong Kong, Singapore and the Malaya States, and 15,000 in Jamaica. In all the other territories under British administration their numbers vary between 1,000 and 2,000. For instance, there are only 10,000 Europeans compared with 200,000 natives, i.e. one European for 2,000 natives. In Sierra Leone there are 650 Europeans and 1,770,000 natives.

## Same In Any Country

**CHICK REMEDIES**

Letters are being received by the

Poultry branch from quite a few farmers stating that they are having some trouble with their chicks and many of

them state that they are using this or that remedy or tonic as recommended by the hatcheryman from whom

they obtained their chicks, or by some feed store. Invariably they state that the medicine isn't doing any good.

All chicks sold by Alberta Approved hatcheries come from Approved Flocks that have been tested for pullorum disease and have been selected for vigor and stamina. Practically 100 per cent of the chicks when hatched are strong and healthy, the weaklings are culled out. Why should they be given a lot of medicine to keep them that way? Have clean and sanitary brooding conditions, well ventilated and free from draughts, with correct temperatures, good chick starter, clean water line right and shell before them at all times. This will keep them healthy and growing steadily.

The best chick remedy for weaklings is sour skim milk given in crockery fountains that are scrubbed and scalded daily.

**PACKAGING OF TOBACCO REGULATIONS REVISED**

Small packages of tobacco are affected by the recent amendment to the packaging order which was to go into effect April 30, and which has been explained to wholesalers. The amending order, effective March 20th, states that packaged cut tobacco may not be sold after April 30th in packages whose weight is less than one-eleventh of a pound. The original order made one-thirteenth of a pound the minimum.

**BRITISH WARTIME NEWSPAPERS**

By Walter R. Legge

Like everything else, the newspapers in England have been very much changed by the war. Imagine news stands which will not sell you a newspaper. Imagine the advertising managers of newspapers being courted by those who are trying to buy a little of the space available.

One of our first experiences was at the news stand in our London house. We had heard rumors of the Dierpiep raid which took place but we had not read anything about it. We were anxious to see a newspaper. However, the news stand could not sell us one unless it was ordered in advance.

Thus we abruptly learned to appreciate a privilege which we do not think about in Canada, the privilege of being able to buy a newspaper at any time.

People in England are now glad to have any paper at all. The privilege of having a paper delivered every day is a highly prized one. A householder who goes away for a time often finds on his return that someone else has taken the right to get his daily paper, and it may be hard to get back in the good graces of the paper boy.

Newsprint is severely rationed in England. Not only have the publishers been forced to reduce the number of pages to a fraction of the usual volume, but the circulation has had to be drastically curtailed. In many cases the size of the paper and the width of the columns have been reduced.

At one of the big newspaper offices we found that the paper has been cut down from an average of 28 pages to four pages. In addition, the circulation has been reduced from 220,000 daily average to 65,000. Several hundred applications for subscriptions each day have to be refused. This is typical of the restrictions on all the newspapers.

Advertising has been cut to almost the same degree as the rest of the paper. The Daily Telegraph, we were told, refuses about thirty columns of advertising every day. Display advertising usually has to be booked several weeks in advance, and even then without any guarantee that it will appear. Advertisements for beer and liquor may still be carried in the English papers although they are now banned in Canada.

It is not surprising, with curtailments in the size and number of pages of the newspapers, that the news is also condensed. There are a great many very short items making up the news columns, but taking into consideration the difficulties under which they are operating, the British newspapers are very readable and give surprisingly good news coverage in the space at their disposal. News of Canada appears in fairly good volume and is well presented.

We found that the Canadian soldiers are quite worried because it is no longer permitted to send papers over by mail, except actual subscriptions. They are afraid that subscription copies may also be banned. They appreciate the home paper now in a way that they never did before they left home. They read every word of it. One officer remarked that he considered a battalion of papers from home as a battalion of morals.

In England the press is still free. The newspapers are able to discuss what they shall print, and free to criticize anybody and anything. In the Axis lands and in the countries the Axis have overrun, those who print the unbiased news, and offer any criticism do so under constant peril of death.

**NO AGE LIMIT SET FOR THOSE GETTING MEAT RATION**  
There isn't an age limit in the meat ration announced by the Wartime Prices and Trade Board for May. Infants, children and adults will be allowed the same weekly ration of two pounds, carcass weight.

Baby hasn't covered all the interest, however. Intensive studies have been made of the nutritional needs of adult workers. On advice of the advisory committee the foods administration has been careful to keep the meat ration large enough to allow after the needs of any person in any occupation.

OF  
DEPARTMENT OF NATIONAL SERVICES

# HOW MUCH Did You Save LAST YEAR?

One of these days a man will call on you to talk to you about saving money. The caller will be one of your neighbors, or a man from your nearest town who is likely well known to you.

He is asking you to save money when he asks you to buy a Victory Bond. He is not asking you to give money to anybody or anything.

You save money when you buy a Victory Bond . . . and you lend your money to Canada to help win the war. The money you save is yours. You will get it back later on, and have it to do anything you wish with it. And Canada will pay you 3% interest on your savings every year until the loan is paid back to you.

## TAKE A FEW MINUTES TO FIGURE OUT HOW YOU ARE GETTING ALONG

This is something that every man should do now and then.

You will see how you are getting along by comparing savings with earnings. *It's what you save that counts.*

Perhaps you will say you saved all you could. Did you? Remember you are asking yourself questions. You are not getting figures to show anyone but yourself. Can you figure out how you can save more?

A sure way to save money is to save it in small sums—as you get it. Victory Bonds—which can be paid for in small installments covering a six-months' period—provide a convenient method of carrying out a savings programme. Your Victory Bond salesman will tell you all particulars.

**WHAT IS A VICTORY BOND?**

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the full face value of the Bond at the time stipulated, with half-yearly interest at the rate of 2½% per annum until maturity.

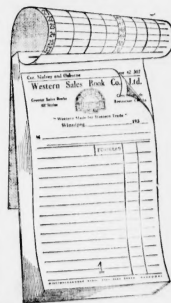

A Victory Bond is the safest investment in Canada. The entire resources of the Dominion stand behind it. Canada has been issuing bonds for 73 years, and has never failed to pay every dollar of principal and interest.

A Victory Bond is an asset more readily converted into cash than any other security.

Buy all the **VICTORY BONDS** you can

WORLD HAPPENINGS  
BRIEFLY TOLD

The London Daily Mail said it had heard the Vatican radio announce it will broadcast in Russian every Monday night.

Nine hundred and fifty-four buildings have been restored in Stalagrad and 20 restaurants have been opened, Russian dispatches reported.

Admiral A. M. Peters, 54, Chief Staff Officer at Gibraltar, has been appointed to a sea command. The Admiralty has announced.

The average price to be paid for the 1943 wool clip is estimated at 26 cents a pound, the prices board said in a return tabled in the House of Commons.

U.S. Navy Secretary Knox said the burned and capsize French liner Normandie will be right side up at her New York pier probably in mid-July.

Inbel, Belgian news agency, reported that nearly all pro-Nazi Belgians in Brussels had received printed funeral cards announcing their own deaths.

Swedish relief organizations have arranged to send civilians in Nazi-occupied Norway 2,000 tons each of tinned, carrots and cabbage, and 1,000 tons of Hungarian peas.

An unusually large number of floating mines have been swept against Sweden's west coast by recent storms endangering shipping and preventing fishermen from putting to sea.

Montagu Norman was re-elected governor of the Bank of England for his 24th consecutive term. He first became governor of the bank in 1920. Basil G. Cattermole was re-elected deputy governor.

The Nazis have looted Norway of at least \$600,000,000 crown (approximately \$2,137,000,000 in the three years of occupation ending April 9, Norwegian economic experts have estimated.

## Vivid Banding Trim

4334

By ANNE ADAMS

Choose this enchanting style for your "first cotton of the year!" It's an Anne Adams Pattern, 4334, and simple to make: the front skirt panel is cut into with the bodice. Gay banding may accent the yokes and crossings pockets.

Pattern 4334 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38 and 40. It is made of 3 yards 35-inch fabric and 1½ yards bias trim.

Send twenty cents (20c) in coin (change cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 100 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

## MARTYR TO SCIENCE

Harold Buggara, a martyr to science, died in a London hospital from X-ray dermatitis suffered after he volunteered as an assistant to Ernest Rutherford, famous atomic expert. When he retired in 1938, completing 35 years work, he had a scar seven inches across his chest, a near eye-blind failing sight and an intense skin irritation.

The English definition of a witch is a "person who hath conference with the devil to consult with him or do some act."

## 'Dishpan' Discarded

Canadian soldiers everywhere will soon be wearing their new battle helmet, (top), which has already been issued to Canadian troops overseas to replace the old dishpan type (bottom). The new Canadian helmet resembles that of the American forces, (centre).

## Suits The Soldier

British War Office Alloys Man On

The service man on leave is to be allowed to travel light in future. If he wishes it—as no doubt he will—he can leave behind in camp or barracks the burden of arms and equipment which is so bothersome in train compartments and corridors. The War Office has given the instruction that the soldier going on holiday should not be required to carry arms and equipment other than that which he may voluntarily care to take with him.—Glasgow Herald.

## SUNDAY SCHOOL LESSON

APRIL 18

PETER AND JOHN IN GETHSEMANE

Golden text: Watch and pray, that ye enter not into temptation: Matthew 26:41.

Lesson: Matthew 26:36-46; Mark 14:10-12.

Devotional reading: Hebrews 2:17, 18; 4:14-16.

**Explanations and Comments**  
Christ's Agony in Gethsemane and the Disciples' Failure There, Matt. 26:36-46. Out from the Upper Room where he had held his last meeting with his disciples, went Jesus and the eleven (Judas having gone to arrange with his enemies to arrest him), along the silent streets, through the eastern gate of the city, down the steep sides of the ravine and across the Brook Kedron, then up the slope of the Mount of Olives to the Garden of Gethsemane, or orchard of the oil press, as its name signifies.

Biding right of the eleven tarry near the entrance of the Garden while he went farther to pray, Jesus took with him only the chosen three who loved him best, Peter and the two sons of Zebedee, James and John, and made them stay nearer him. He was relying upon their sympathetic presence and watchful care in a time when his soul was exceeding sore, even unto death.

"Jesus felt a human hunger for companionship. Jesus was personally sociable. He evidently enjoyed mixing with people. He liked the life and take-of life. He had friendships. There was a group of men and women gathered around him who gave him their devoted loyalty. He in turn needed them. The denial of Peter and the betrayal of Judas hurt him partly because they were defections from the comradeship of his group. In Gethsemane he craved friendship. He prayed to God, but he reached out for Peter and John. The longing for friendship and the unrest of loneliness was a proof of a truly human and social nature (Walter Rauschenbush)."

Going a little farther among the trees, out of the moonlight probably, for it was the Passover and full moon, Jesus cast himself on the ground in an agony of spirit and prayed that if possible the cup might away. The prayer was not that if God had the power to take away the cup, but if it were in accordance with his father's will that it should be removed. The cup stands for an appointed portion; in Ps. 75:8 it is the portion of judgment; in Ps. 22:5 mercy; here, of suffering and death.

Jesus went back to the disciples as though seeking their sympathy, and found them sleeping. To Peter he said, "What, could ye not watch with me one hour?" "Watch and pray," he counseled, "that ye enter not into temptation." "Watch and pray, all of you, so that ye may not slip into temptation." "For ye are circumvented by devils," the apostles, saying, "The spirit indeed is willing, but the flesh is weak."

## NO LONGER EMPTY

Coal trucks which formerly travelled empty from New York to the mines now carry sugar, potatoes and materials needed by war plants on their outbound trips.

## By Fred Neher

"Stop complaining! Junior calls on his sister and ties up their father's car for seven days a week, too!"

## REG'LAR FELLERS—On to Himself

## Jack Miner

Jack Miner celebrated his 78th birthday on April 10.

During the past year the press has given him credit for publicizing Canada and promoting tourist trade more than any other single individual in the Dominion, while one editorial has referred to him as "Canada's Ambassador of Good Will." For 38 years Jack Miner toured both Canada and the U.S. at his own expense on lecture tours filling the largest auditoriums in both countries and preached the value of tourists coming into Canada.

Certainly no one will question but that his writings, his lectures on bird life and his bird sanctuary, which is a living example, has done more than any individual to awaken the interest in the value of Bird Life to not only Canada, but to all North America. Jack Miner's name is a household word when you mention bird life. At no expense to anyone he toured the western provinces of Canada seven times in five years preaching reforestation with the result many windbreaks can be seen for miles on the prairies, planted around farms and as wind breaks. The idea in many cases was awakened by him twenty or more years ago. His scientific research work, in banding bird life and studying its route of migration can't be valued in dollars and cents from the educational standpoint while his missionary work in using the fowl of the air to spread the gospel, has caused many religious periodicals to refer to him as the greatest missionary on the continent.

## Have Been Improved

Lights On Life-Jackets Of Merchant Navy More Efficient

The light which has for some time been a part of the life-jacket used by the Merchant Navy has been further simplified and improved. Not only is it now more efficient, but quicker deliveries can be made. The light itself is attached to the shoulder of the jacket by a spring clip which cannot be washed off even in the heaviest seas. The battery is in a pocket in the jacket, and the light is switched on by inserting a captive plug into a socket on top of the battery container. This can be done with two fingers, and no special instructions are necessary. The light can be seen over great distances at sea, and many lives have been saved by it.

## SEEING IS BELIEVING

Two New Jersey boys were members of an outfit that was shipped to the West Coast. They saw the Pacific for the first time.

"Do you know," one of them asked the other, "the Pacific Ocean is over twice as big as the Atlantic?"

The other chap shook his eyes and grazed out over the water. After a moment he spoke, "It sure is," he said.

## WILL WELCOME CHANGE

The Toronto Globe and Mail says: No doubt, after a year or two in the army, many a young man with farming experience will be delighted to get back in the fields again for the summer's work. A change is as good as a rest.

## Tired Of Hardships

But German People Not Thinking Of Revolting Against Hitler

Maurice Hindus, in the American Magazine, says the information in letters found on the German dead, intimate and personal as it is, leads to some striking deductions. The people inside Germany hate the war and wait it to end. They are tired of hardships, sick of sacrifice. They lament the moral disintegration of their young women; they shudder at air raids; they weep over their dead. But nowhere do they betray the least suggestion of German guilt or regret for horrors which the German armies perpetrate.

Hard as is their life, they know neither starvation nor desperation. Nor do they expect Germany to lose the war. To expect them at this time to revolt against Hitler is as futile and puerile as to expect the Fuehrer to live up to his promises or treaties.

Diaries of the German dead, particularly Nazi officers, support these conclusions. The Russians have gathered thousands of these.

## FIELD KITCHEN TRAILERS

Five mobile field kitchen trailers were presented to the home guard of an English county, by Viscount Bennett on behalf of the Canadian Red Cross, to mark appreciation of the close co-operation between the home guards and a Canadian corps stationed in the county.

CHAPTER II—Continued

Everyone was in the breakfast room the next morning when Smithy descended. Sheldon had informed them of the "mystery" of the day before, the buzz of conversation was quite audible as Smithy entered. They were all chattering and waiting for him. They greeted him but it was an odd get together for the first time. It was of appreciation. Just how much money would they have now that their brother was back? Smithy took the bill by the horns. He was going to step right into his father's business and start running it himself. Anyone who didn't believe in him, could buy out now and be paid off in cash. There were no acceptance but doubt hung over the table like cigarette smoke. Finally everyone decided to be out and there was only one member of the family left. Kitty, step-daughter of Smithy's sister, Jill. Smithy had noticed how Kitty had grown, been vaguely aware of her youthful, flowering beauty. Now she forced herself on his attention with shy flirtatiousness. "You know," she said, "I'll be eighteen in several

years. And you'll probably be thinking of a woman in your life by that time."

"It was rather amusing at her audacity. 'I'll keep you in mind.' 'Will you?' she asked eagerly. 'Oh, I know you're laughing at me but please don't do anything rash in the morning because I might do like you so awfully—and in a different way than when I was little.' She smiled as tenderly as ever. 'I'll remember that Kitty—but I'll have to think it over.' She clasped his hand and blurted out: 'Anyway don't you think I might come here in the holidays? Sort of take care of you?'

"What would your mother say?"

"Jill? Kitty made a gesture. Her twice divorced mother had very little to say over her. 'Oh she wouldn't mind. She loves to get rid of me. Anyhow, you'll write, won't you?' He hesitated. Then he nodded. 'All right if you want me to.' He watched them in the driveway as the car drove off and Kitty called back, 'Goodbye Uncle Charles. Thanks for asking me to come and visit you in the holidays.' They were gone and his face clouded over. Once more he felt alone. With the exception of Kitty they had given him no comfort. But they had been human beings, his own, he once more felt lost.

In the next few days his work went surprisingly well. His office in London were enlarged twice over and production of many factors was given space, doubling semi-annually. Much to their own surprise, his brothers and sisters were drawing far larger incomes than they had ever anticipated.

True to his promise, Smithy had lowered Kitty's salary. He had done even just, actually showed up at her college graduation and stopped in for a dance or two at her debut. Since then, he'd acquired her about London and now they were close friends indeed, with much more in common than Smithy would have admitted. He often wondered where it was all leading but refused to pursue the disturbing matter any further in his thoughts.

It was a sunny June day and he and Kitty sat at a luncheon table just overlooking the Thames. They had been chatting easily. Now Kitty spoke with a sudden abruptness, called several well-grown up in that moment. "Charles, you know you've said me for other, aren't you?"

"He was startled. 'But my dear, that's ridiculous.' She crushed out her cigarette. 'Oh, it's all right. I'll marry some nice young man eventually and be quite happy.' There was a shame-faced

tear in her eye. 'But it's no mere coincidence, Charles! England, India is that? I've always been mad about you even as a schoolgirl?' He didn't reply and she added wistfully, 'It is sort of a pity that you're not in love with me, Charles. We do laugh at the same things, enjoy so much together—'

His voice was soft. He hardly knew himself, why he was speaking. 'Perhaps I am in love with you.' It was a second before she could control her voice. 'Charles, you're not joking? But it seems—so fantastic, I can't believe it.' He reached across the table and took her hand. 'Not fantastic Kitty,

tear in her eye. 'But it's no mere coincidence, Charles! England, India is that? I've always been mad about you even as a schoolgirl?' He didn't reply and she added wistfully, 'It is sort of a pity that you're not in love with me, Charles. We do laugh at the same things, enjoy so much together—'

MR. T. A. PUMPHREY is a war worker. He began to feel drowsy, nervous and all his always complicated. An inactive liver was the cause—frankly, it was the cause. Back to your liver with Pumphrey's, Canada's Largest Selling Liver Tablets.

Quite understandable. You're a lovely charming girl and I—I need someone like you. I'm dependent on you to help me build a new life. Her eyes rounded. 'Then you really mean it Charles? You want me to marry you?' 'And it isn't just something you'll forget when you go back to the office.' He smiled. 'If I do I'll tell my secretary Miss Ransom to remind me.' She blushed and her eyes sparkled. 'Oh Charles, it's all so marvelous. Quick, take me out of here. Let's go some place where you can kiss me.' He returned to the office a little later and rang for Miss Ransom. For a moment he sat there, poring over the blueprint of the factory his company had just bought at Melbridge. He frowned, Melbridge. He'd never been there, just the same as the place struck some spark in him as he saw it. And now they were close friends indeed, with much more in common than Smithy would have admitted. He often wondered where it was all leading but refused to pursue the disturbing matter any further in his thoughts.

## GARDEN NOTES

**Big Croppers For Gardens**

Much will depend upon the location and size of the vegetable garden as to the crops grown in it. If tiny, say less than 50 feet square, the authorities advise concentrating on such vegetables which give the best yield per row. This means small, compact things like carrots, cress, lettuce, beans, spinach, onions, radish, possibly a few staked tomatoes. With the first item every 12 feet of row, if given a little attention in the way of thinning, culm, and perhaps watering and fertilizer, should produce many good meals for the full-sized family. And as the rows can be spaced a mere foot apart, a small plot will grow a lot of crop.

The staked tomatoes will take up more room. They should be 18 inches apart in the row, but one plant should grow a big basket of tomatoes, and if all side shoots are nipped off and the plant tied loosely to a six-foot stake it will ripen the fruit surprisingly early.

It doesn't pay to grow bulky things like potatoes in the tiny vegetable garden, and a winter's supply of carrots, onions, beets, etc., should not be attempted. Corn and peas take up a lot of room but because they are never so tasty as when taken right out of the garden at the bush, sometimes even city gardeners try to squeeze them in.

Garden corn should be grown in rows about 12 to 18 inches apart, and supply the small family at least a dozen hills of corn are necessary, and from 10 to 50 feet of row or space.

**Transplanting**

These three important factors in successful transplanting are moisture, shade and the excelsior. If all possible, and especially with 10-foot maple, experts stress the importance of the excelsior. They say, transplanting should be done on a dull day or evening, with water around the roots and press the soil firmly to exclude air. If all possible, and especially with 10-foot maple, experts stress the importance of the excelsior. They say, transplanting should be done on a dull day or evening, with water around the roots and press the soil firmly to exclude air.

Moving a plant is something like an operation for a human being, and the larger the specimen the more careful the attention. With shrubs and trees, often main roots are cut, and a severe shock is given. Pick-up in the way of quickly available commercial fertilizer will help at the time, merely a pinch for small things like tomato plants or asters, and press up to a couple of handfuls for shrubs and trees.

**SMILE AWHILE**

Doctor—How often does the pain come?  
Patient—Every four or five minutes.  
Doctor—And last?  
Patient—Well, a quarter of an hour, at least.

"Were you nervous?" asked young Mrs. Hobson, "when you begged daddy to give you a consent?"

"He gave me the fright of my life," grunted Hobson.

She is still wondering what he meant.

Impatient Customer—Can't you wait on me? Two pounds of liver; I'm in a hurry.

Butcher—Sorry, madam, but two or three are ahead of you. You surely don't want your liver out of me?

.....

"What's good for my wife's fallen arches?"

"Rubber heels."

"What shall I rub 'em with?"

.....

Little Fellow (in Sunday school class when he had been forced against his will to donate a dime to the missionary cause)—Darn it, I wish I was a heathen.

Teacher (in sorrow)—George! Don't do you mean?

Little Fellow—Oh, well, the heathen don't have to give nothing—they just do all the getting.

.....

Nurse (bringing little Betty home)

### SHOULD GET IN COAL FOR FALL

Compelling necessity of cooperation of the consumer public in obtaining supplies of coal for next winter at an avert shortages is now urged by W. J. Taylor, regional coal controller.

"Unless the consumer public co-operate now and help to make up the slack season which will occur during May and June, the situation next year will be as acute if not more so than last," the Controller warns.

Mr. Taylor advises schools, public buildings, churches and the civilian population to begin at once to store coal in piles and bins, and to contact coal dealers to see that they place orders now to fill their storage areas. This, with available production in cold weather to replenish the stocks would minimize the threat of a possible shortage, he states.

### BRIDGES, FACTORIES DISAPPEAR IN ENEMY CAMERAS

Up to the present war camouflage paints proved fairly satisfactory in hiding the painted object from enemy observation but the modern reconnaissance plane equipped with elaborate cameras taking the latest infra-red photograph film has necessitated the introduction of infra-red reflecting camouflage paints.

Objects covered with earlier camouflage paints are clearly discernible in the infra-red photograph because their infra-red reflective properties are different from those of natural foliage. Now such objects as bridges, factories and armaments can be rendered practically invisible to the naked eye or lens of the enemy camera by the use of new infra-red reflecting paints, perfected in the Toronto laboratories of the C-I-A Paint and Varnish Division.

Be ready at all times to reverse your opinion. You may be wrong. Very, very wrong.

### MOST SHOTGUN TYPES NOW FREED FOR SALE

Early last November it became necessary to ban the sale of new shotguns in order that an inventory of stock in Canada could be taken, and so that the Dept. of Munitions and Supply could purchase guns needed by the Ferry Command, by guards at industrial plants, reservoirs, power houses and similar vital zones.

The inventory is now complete and a considerable percentage of the guns required have been ordered by the Department. Therefore a new order has been issued which permits the retailer to offer for sale most of his stock of guns. The makes and types still not freed for sale through retail channels are: Single Barrels—Savage, Iver Johnson, Winchester, Harrington, R. Double Barrels—Savage, Iver Johnson, Leige, Fox, Belknap, Winchester, Wootton, Springfield, Le Fever and Boshell.

No mention is made of repeater shotguns or automatics and it is presumed these can be purchased if they are available.

### REASONS STATED FOR RATIONING AMMUNITION

Two thirds reduction in the metal available for small arms ammunition is for civilian use is the reason for the recent rationing order says P. G. Jones, administrator, Wartime Prices and Trade Board.

The supply situation in Canada has grown progressively worse, copper alloy is in short supply, vital material

for civilian ammunition is used for war purposes and the men who fight must get it first.

There is still provision for essential users to obtain small arms ammunition. The farmer who scares the sneak thief fox in his chicken pen can take a shot at him. No hunter need go hungry for lack of ammunition to bring down game on the trail. Police, prospectors, trappers and others are also among those considered essential users for its use.

### WHAT IS A VICTORY BOND?

A VICTORY BOND is the promise of the Dominion of Canada to repay in cash the full face value of the bond at the time stipulated, with half-yearly interest at the rate of 5% per annum until maturity.

A Victory Bond is the safest investment in Canada. The entire resources of the Dominion stand behind it. Canada has been issuing bonds for 75 years, and has never failed to pay every dollar of principal and interest.

A Victory Bond is an asset more readily converted into cash than any other security.

HOLD HIGH THE TORCH OF FREEDOM

# VICTORY

Nothing short of victory over the powers of aggression will ensure a just and peaceful order after the war. There can be no compromise with international bandits.

In that victory all of us wish to share.

Victory's price is high.

Some have the privilege of fighting; all have the privilege of saving money to supply our fighters with modern engines of war.

Enormous sums of money must be raised for ships, planes, tanks, guns, bombs, shells and bullets.

Have a share in the victory by saving to—

Buy Victory Bonds and War Savings Certificates and Stamps—

Pay the necessarily heavy Income Taxes—

IN ADDITION TO

Keeping up your Life Insurance and Providing for your Future Independence—

Such a programme of determined, systematic saving is part of the price of VICTORY.

Each parcel will be offered for sale subject to the approval of the Minister of Municipal Affairs, and subject to a reserve bid and to the reservations contained in the existing certificates of title.

Terms, cash.  
Redemptions may be effected by payment of all arrears of taxes and costs, at any time prior to the sale.  
Dated at Carbon, Alberta, this 18th day of March, 1943.

ALEX REID,  
Secretary-Treasurer

### "IF YOU SEE ANYBODY LOOKING FOR A GOOD BULL, I'VE GOT ONE FOR SALE"

Passing the word along to your neighbors that you have a bull, or a horse, or a hundred bushels of seed oats for sale, is advertising. If you wanted to give your advertising message wider distribution, you'd have it printed in the local paper.

That is exactly what the advertisers in this issue—letting it be known what they have to market.

They can't afford to misrepresent their merchandise, because no news of sharp practice soon gets around. To continue selling, an advertiser must have a reputation for honest dealing. He is entitled to an honest profit as long as he gives the purchaser his money's worth.

Advertising continues to be useful because it renders a service, both to the seller and the buyer. It pays to advertise... and it pays to read the other fellow's advertisement.

ADVERTISE REGULARLY IN  
THE CARBON CHRONICLE

Snicklefritz----

Gert: "Poor man! He suffers from matrimonial dyspepsia."  
Myn: "What's that?"  
Gert: "Oh, his wife doesn't agree with him."

Wife: "Do you think the mountain air will disagree with me?"  
Hubby: "I doubt if it would dare, my dear."

Hostess (gushingly): "You know, I have heard a great deal about you."  
Politician (absentmindedly): "Possibly, but you can't prove anything."

Machaniash: "I hear your friend Angus has married a third wife."  
Elder: "Aye, Angus is an expensive friend; two wreaths and three wedding presents in seventeen years!"

Bursting with satisfied pride, Mrs. Newstead carefully cut the cake on the table and placed a handsome slice on her husband's plate.

"I made it all myself, darling," she said, "My first cake."

Sampling it with gradually diminishing enthusiasm, he said: "Did you lift it out of the oven all by yourself, dear?"

Country teacher, enrolling two broods: "To the first: 'Your name and date of birth.'"—John Brown, born 12th June, 1937."

To the second teacher: "And yours?" "James Brown, born 12th June, 1937."  
Teacher: "Are you twins?"  
Brothers in union: "No, miss, we're not."

Teacher (bewildered): "Then what are you?"  
The brothers: "Please, miss, we're all that's left of tripelets."

An Edinburgh woman walked into a war savings pavilion and laid her hand on the table with a decisive firmness.

"I've been saving this up to divorce my husband," she said, "but I've made up my mind now to deal with Hitler first."

Something went wrong in the cook-house and the picnic was as hard as a brick. The menu was sent it back with a message: "Give us the tools and we'll finish the job."

You can buy Victory Bonds for cash in a lump sum, or you can arrange to pay for them in convenient instalments over a period of six months.

Your Victory Bond salesman will be glad to tell you full particulars.
